SUMMARY

Java Full Stack Developer with 3+ years of experience building enterprise healthcare and government platforms, including ABHA/ABDM integrations, billing systems, and secure teleconsultation workflows. Strong in Java, Spring Boot, microservices, PostgreSQL, and security hardening. AWS Certified Solutions Architect and Confluent Certified Kafka Developer. Contributed to architecture decisions and mentored 2 junior developers.

TECHNICAL SKILLS

- **Languages & Backend:** Java 8/17/21, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, Design Patterns.
- **Security:** Spring Security, Role-Based Access Control (RBAC), OWASP Top 10 mitigation, VAPT remediation.
- **Databases & Caching:** PostgreSQL, MySQL, Redis.
- **Cloud & DevOps:** AWS (Certified SAA & CCP), Confluent Certified Kafka, Docker, Kubernetes, Maven, Git, SVN.
- **Testing & Quality:** JUnit 5, Mockito, REST Assured, SonarQube.
- **Frontend:** React, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3.
- **Practices:** Domain-Driven Design (DDD), SOLID Principles, Agile, Scrum, Code Review.

PROFESSIONAL EXPERIENCE

Trinity Enterprises International Limited, Mumbai, India | *May 2023 – Present*
Software Developer | *Nov 2023 – Present*

- **Healthcare integrations:** Implemented end-to-end ABHA/ABDM integration (M1/M2/M3) with FHIR-compliant data exchange and secure teleconsultation workflows, serving 2 facilities.
- **Architecture initiative:** Proposed and built a proof of concept to modernize the monolithic HMIS into a microservices architecture, designing the Config Server, Eureka service registry, API Gateway, and 6 Spring Boot domain microservices.
- **React frontend:** Built the React frontend for the PoC, implementing the common data form save workflow end to end, from a dynamic, validated form UI (React Hooks, controlled components) through the API Gateway to the Spring Boot services and PostgreSQL.
- **Billing and finance:** Built multi-payer billing workflows covering charge calculation, payments, receipts, and reconciliation for water, fire, and property tax, processing 10,000+ transactions across 3 payer types.
- **Security and compliance:** Identified and remediated 20+ vulnerabilities (SQL injection, XSS, CSRF, insecure CORS) from VAPT findings, and implemented RBAC with Spring Security and Redis-based sessions, closing 5+ critical findings.
- **Data protection:** Built a Spring Boot and Spring Batch service (Java 21) to migrate 4 million records into encrypted, hashed, and masked columns using OpenBao, supporting DPDP Act 2023 compliance with zero data loss.
- **Performance:** Cut average API response time from 1,800 ms to 400 ms (78% faster) through PostgreSQL query tuning, indexing, and Redis caching, handling 100 concurrent users.
- **Delivery and quality:** Shipped 5 modules (registration, billing, analytics, user management, admin) to production in Spring Boot and PostgreSQL, wrote JUnit 5 and Mockito tests, and resolved 300+ production defects while working with DevOps and DBA teams in Scrum.

Software Development Intern | May 2023 – Oct 2023
Urban Local Body (ULB) Government Portal | Java 8, Spring Boot, JavaScript, PostgreSQL, Jasper Reports

- Resolved 100+ critical defects and delivered enhancements in the property billing module (water, fire, and property tax), improving payment and receipt accuracy.
- Built the HRMS module covering employee registration, leave encashment, and salary slip generation for 100+ employees.
- Designed dynamic citizen service reports, receipts, and payslips in Jasper Reports, reducing manual effort for the department.

PROJECTS

Kartly — Scalable E-Commerce Marketplace | GitHub | Live Demo
Tech Stack: Java, Spring Boot, React, Microservices, PostgreSQL, AWS S3, Apache Kafka

- Built a multi-role marketplace (customers, sellers, admins) as 5 Spring Boot microservices with a React frontend and PostgreSQL.
- Used Kafka to publish order-placed events that trigger inventory updates and seller notifications across services, with retry.

FoodSwift — Cloud-Native Food Delivery Platform | GitHub | Live Demo
Tech Stack: Java, Spring Boot, Angular, Microservices, PostgreSQL, Docker, Kubernetes

- Built 5 Spring Boot services (auth, restaurants, orders) with an Angular frontend, secured with JWT.
- Containerized with Docker and deployed on Kubernetes with Ingress hosted on Minikube.

EDUCATION

Master of Computer Applications (MCA) — Manipal University Jaipur Jul 2025 – 2027 (Expected) (Part-time)
Bachelor of Engineering, A. C. Patil College of Engineering, Kharghar | CGPA 8.42 Jul 2018 – Aug 2021
